

10 Year Summary									
1993	1994	1995	1996	1997	1998	1999	2000	2001	2002
									32.3

	Q1	Q2	Q3	Q4	Average
2002	38.8	30.8	29.1	30.7	32.3
2003	23.7	30.7			27.2

Average Length of Stay (ALS) has proven to be a difficult variable to measure. We are currently experimenting with a new procedure that suggests that the current statewide ALS for all inmates is about 30 days. The previous measurement method produced an ALS estimate of about 23 days. Hopefully we will have a reliable and accurate estimate of the ALS in the near future. Until then, please use caution when interpreting these data.
